## Top Skills

Oracle Database  
Spring Framework  
Database Management System  
(DBMS)

## Languages

Kannada (Native or Bilingual)  
Hindi (Professional Working)  
English (Full Professional)

## Certifications

machine learning data science and  
Deep learning with Python  
The Data Science Course 2020:  
Complete Data Science Bootcamp  
AWS Certified Solutions Architect –  
Associate

## Publications

Speech Recognition System Using  
Deep Neural Network  
Experimental Analysis of  
Performance Metrics for  
Configuration of Auto Scaling  
Groups

# Dhanush Dinesh

AVP, Sr. DevOps Engineer @ Citi | DevOps, Automation, Cloud |  
AWS Certified Solutions Architect – Associate  
Irving, Texas, United States

## Summary

As a Sr. DevOps Engineer, Assistant Vice President at Citi, I work on building applications and creating infrastructure to deploy them as docker containers. I use my skills in Amazon Web Services (AWS) to automate many CI-CD processes and orchestrate various services using knowledge graphs and Kubernetes. I enjoy working on the latest cloud computing platforms and delivering reliable and robust solutions for the financial industry.

Before joining Citi, I completed my Master of Engineering in Computer Engineering from Virginia Tech, where I also worked as a graduate teaching and research assistant. I was involved in a project to index around 4 million electronic theses and dissertations using a web application that I built with a lightweight docker image. I also published two research papers on using speech as instructions for web-based services and on integrating auto-scaling groups in the cloud infrastructure. I am passionate about learning new technologies and applying them to real-world problems.

---

## Experience

### Citi

Sr. DevOps Engineer, Assistant Vice President  
May 2023 - Present (3 years 3 months)  
Irving, Texas, United States

- Maintained Zephyr Enterprise and automated deployments using Ansible & Jenkins for 5,000 users
- Created a Python script to migrate test cases from Jira Squad, reducing manual effort by 900 hours
- Worked on creating microservices to onboard our users using Spring Boot and deployed these services in OpenShift using Docker image
- Automated removal of legacy custom fields by converting them into tags, eliminating 30M+ database rows and improving application performance; saved 800 days of manual effort and \$450,000 in operational costs

## Virginia Tech College of Engineering

1 year 10 months

### Graduate Research

May 2022 - May 2023 (1 year 1 month)

- Built a lightweight docker image to host a web application to index around 4 million ETDs
- Used knowledge graph (DAGs) to interconnect various services we created by using Apache Airflow
- The pipeline of the application was created by orchestration services in Kubernetes using Rancher

### Graduate Teaching Assistant

August 2021 - May 2023 (1 year 10 months)

Blacksburg, Virginia, United States

GTA for Intermediate Physics course under Dr. Thomas O'Donnell

GTA for Fundamentals of Digital Systems under Dr. Kristie Cooper

GTA for Computer Vision ECE 5554 under Dr. Creed Jones

Grading of Fundamentals of Digital Systems under Dr. Kristie Cooper

## Aurigo Software Technologies

1 year 8 months

### Software Engineer 1 - DevOps

January 2021 - August 2021 (8 months)

Bengaluru, Karnataka

- Built a robust fully automated seamless deployment CI-CD pipeline to manage company's websites
- Developed an automated server connection system which helped eliminate 120hr of manual work every quarter
- Devised scripts to automate the creation of load balancer, target group, take backups and migrated data from S3 which saved the company more than \$200,000
- Worked on amazon web service (AWS), azure devops as well as SQL server management studio

### Projects and Initiatives (Designed)

- Application Copy Framework
- Remote script execution using SSM
- AzureDevOps Pipelines
- Release Pipeline Framework

- Customized and flexible framework for Application Deployment using Azure Releases
- Powershell script in backend
- SonarQube deployment
- Azure DevOps Release integrated
- Migration of S3
- Automation of service connections creation and updation

Worked on integration of DevOps processes.

Help build a robust fully automated seamless deployment pipeline.

Managed many AWS, Azure and SSMS services.

### Intern Cloud Ops

January 2020 - December 2020 (1 year)

Bengaluru, Karnataka, India

- Built a highly available, fault tolerant infrastructure on AWS
- The infrastructure consist of multiple servers in multiple availability zones with the implementation of load balancing, auto scaling for higher reliability and web traffic management for a highly available web application
- Worked as DataBase Administrator (DBA) and took care of DB servers

---

## Education

### Virginia Tech

Master of Engineering, Computer Engineering · (August 2021 - May 2023)

### R. V. College of Engineering, Bangalore

Bachelor's degree, Electrical, Electronics and Communications

Engineering · (2016 - 2020)
